

CV-to-Job Matching Benchmark

Independent AI-authored targets vs application scoring | 10 synthetic CV-JD pairs

10 CASES	MAE 8.52 pp	ALIGNMENT 91.48%	STATUS FAIL
----------	-------------	------------------	-------------

Execution: 10/10 successful (100%). Alignment: 5/10 within 10 percentage points. Generated 2026-09-11 07:22:17 UTC.

Pair	Candidate role	Job title	AI baseline	App score	Delta (pp)	Alignment
01	Senior Backend Developer	Senior Backend Developer	95.00%	82.14%	12.86	FAIL
02	Lead DevOps Engineer	Lead DevOps Engineer	94.00%	81.68%	12.32	FAIL
03	Senior Business Analyst	Senior Business Analyst	91.00%	82.47%	8.53	PASS
04	Backend Developer	Senior Backend Developer	63.00%	66.47%	3.47	PASS
05	DevOps Engineer	Senior DevOps Engineer	57.00%	67.88%	10.88	FAIL
06	Junior Data Analyst	Data Engineer	48.00%	56.07%	8.07	PASS
07	Frontend Developer	Senior Backend Developer	25.00%	35.24%	10.24	FAIL
08	Financial Analyst	Machine Learning Engineer	18.00%	34.82%	16.82	FAIL
09	Senior Chef	Lead DevOps Engineer	2.00%	0.00%	2.00	PASS
10	Restaurant Cook	Python Backend Developer	0.00%	0.00%	0.00	PASS

MAE and deltas are percentage-point errors, not statistical precision. Alignment score = 100 - MAE. Final PASS requires every case to execute and every absolute delta to be at most 10 points.

Granular category comparison

Each cell shows AI baseline / application score. Category labels are independently judged; they are not back-calculated from the application's weighting formula.

Pair	Skills (%)	Context (%)	Experience (%)	Education (%)
01	100.0 / 100.0	92.0 / 43.8	100.0 / 95.0	100.0 / 100.0
02	100.0 / 100.0	94.0 / 38.9	100.0 / 100.0	100.0 / 100.0
03	100.0 / 100.0	90.0 / 41.6	100.0 / 100.0	100.0 / 100.0
04	60.0 / 85.0	75.0 / 35.4	55.0 / 59.3	100.0 / 100.0
05	65.0 / 90.0	65.0 / 35.1	55.0 / 64.2	65.0 / 85.0
06	50.0 / 70.0	55.0 / 34.3	45.0 / 68.9	50.0 / 40.0
07	20.0 / 30.0	20.0 / 16.2	25.0 / 41.9	100.0 / 100.0
08	15.0 / 45.0	10.0 / 1.1	25.0 / 75.0	10.0 / 15.0
09	0.0 / 20.0	0.0 / 0.0	5.0 / 75.0	10.0 / 75.0
10	0.0 / 20.0	0.0 / 0.0	0.0 / 75.0	0.0 / 15.0

Evaluation protocol

Independent AI-authored judgments frozen before application execution; not ground truth or a live second-model API.

Overall baseline targets and category judgments were frozen before application execution. They are subjective reference labels, not verified ground truth. The model's original weights, constraints and scores were not changed to improve this benchmark. Ten synthetic examples cannot establish real-world accuracy.

Requested backend: tfidf; reranker enabled: False. Actual methods: tfidf. No live external AI evaluator was called.
Dataset SHA-256: d1e51b9bee6b15565c63c58802132bceb2a54d9a6d3f936475e10119571b0d14

Discrepancies & tuning priorities

Cases outside the predeclared tolerance. Suggestions are hypotheses for a separate held-out benchmark, not automatic tuning instructions.

Pair 01 | Senior Backend Developer to Senior Backend Developer

Baseline rationale: All named technologies, senior role, duties and minimum education are documented with more than eight years of experience.

- Application score is 12.86 points lower than the independent target.
- Inspect duties/summary evidence and the actual semantic backend; compare a locally cached cross-encoder on held-out paraphrases.
- Check role-specific years, seniority aliases and the recency decay; total tenure can overstate transferable experience.
- Confirm the subjective baseline with independent human reviewers before changing weights; do not tune on these same ten cases.

Pair 02 | Lead DevOps Engineer to Lead DevOps Engineer

Baseline rationale: Ten years of directly relevant infrastructure work, matching lead title and all named tools; required CKA is documented.

- Application score is 12.32 points lower than the independent target.
- Inspect duties/summary evidence and the actual semantic backend; compare a locally cached cross-encoder on held-out paraphrases.
- Review no-requirement credit and the 50/30/20 skill weights; validate mandatory-stack coverage on held-out labels.
- Confirm the subjective baseline with independent human reviewers before changing weights; do not tune on these same ten cases.

Pair 05 | DevOps Engineer to Senior DevOps Engineer

Baseline rationale: Container operations are relevant; cloud provisioning tools, required CKA and senior-level evidence are absent.

- Application score is 10.88 points higher than the independent target.
- Inspect duties/summary evidence and the actual semantic backend; compare a locally cached cross-encoder on held-out paraphrases.
- Review no-requirement credit and the 50/30/20 skill weights; validate mandatory-stack coverage on held-out labels.
- Confirm the subjective baseline with independent human reviewers before changing weights; do not tune on these same ten cases.

Pair 07 | Frontend Developer to Senior Backend Developer

Baseline rationale: Git and general software background transfer, but core backend stack, banking duties and seniority are missing.

- Application score is 10.24 points higher than the independent target.
- Check role-specific years, seniority aliases and the recency decay; total tenure can overstate transferable experience.
- Review no-requirement credit and the 50/30/20 skill weights; validate mandatory-stack coverage on held-out labels.
- Confirm the subjective baseline with independent human reviewers before changing weights; do not tune on these same ten cases.

Pair 08 | Financial Analyst to Machine Learning Engineer

Baseline rationale: SQL is the only directly named shared skill. Financial reporting does not establish model engineering expertise or the required education.

- Application score is 16.82 points higher than the independent target.
- Check role-specific years, seniority aliases and the recency decay; total tenure can overstate transferable experience.
- Review no-requirement credit and the 50/30/20 skill weights; validate mandatory-stack coverage on held-out labels.
- Confirm the subjective baseline with independent human reviewers before changing weights; do not tune on these same ten cases.

Per-case scoring evidence

The following pages preserve all 12 application sub-scores. Complete synthetic CVs, JDs, model responses, routing and warnings are in the companion `benchmark_match_results.json`.

Pair 01 | Senior Backend Developer to Senior Backend Developer

All named technologies, senior role, duties and minimum education are documented with more than eight years of experience.

Category	Sub-score	App (%)
Skills	hard skills match	100.00%
Skills	tools and frameworks match	100.00%
Skills	soft skills match	100.00%
Context	domain relevance	100.00%
Context	responsibilities match	19.70%
Context	summary alignment	19.70%
Experience	years of experience fit	100.00%
Experience	title seniority match	80.00%
Experience	recency factor	100.00%
Education	degree level fit	100.00%
Education	field of study relevance	100.00%
Education	certifications match	100.00%

Pair 02 | Lead DevOps Engineer to Lead DevOps Engineer

Ten years of directly relevant infrastructure work, matching lead title and all named tools; required CKA is documented.

Category	Sub-score	App (%)
Skills	hard skills match	100.00%
Skills	tools and frameworks match	100.00%
Skills	soft skills match	100.00%
Context	domain relevance	100.00%
Context	responsibilities match	12.75%
Context	summary alignment	12.75%
Experience	years of experience fit	100.00%
Experience	title seniority match	100.00%
Experience	recency factor	100.00%
Education	degree level fit	100.00%
Education	field of study relevance	100.00%
Education	certifications match	100.00%

Pair 03 | Senior Business Analyst to Senior Business Analyst

Direct banking analysis history, relevant degree, PMP and required analysis tools support a strong match.

Category	Sub-score	App (%)
Skills	hard skills match	100.00%
Skills	tools and frameworks match	100.00%
Skills	soft skills match	100.00%
Context	domain relevance	100.00%
Context	responsibilities match	16.51%
Context	summary alignment	16.51%
Experience	years of experience fit	100.00%
Experience	title seniority match	100.00%
Experience	recency factor	100.00%
Education	degree level fit	100.00%
Education	field of study relevance	100.00%
Education	certifications match	100.00%

Pair 04 | Backend Developer to Senior Backend Developer

Relevant backend foundation and degree, but two required tools, senior title evidence and five-year history are missing.

Category	Sub-score	App (%)
Skills	hard skills match	100.00%
Skills	tools and frameworks match	50.00%
Skills	soft skills match	100.00%
Context	domain relevance	100.00%
Context	responsibilities match	7.66%
Context	summary alignment	7.66%
Experience	years of experience fit	73.87%
Experience	title seniority match	0.00%
Experience	recency factor	100.00%
Education	degree level fit	100.00%
Education	field of study relevance	100.00%
Education	certifications match	100.00%

Pair 05 | DevOps Engineer to Senior DevOps Engineer

Container operations are relevant; cloud provisioning tools, required CKA and senior-level evidence are absent.

Category	Sub-score	App (%)
Skills	hard skills match	100.00%
Skills	tools and frameworks match	66.67%
Skills	soft skills match	100.00%
Context	domain relevance	100.00%
Context	responsibilities match	7.34%
Context	summary alignment	7.34%
Experience	years of experience fit	82.00%
Experience	title seniority match	0.00%
Experience	recency factor	100.00%
Education	degree level fit	100.00%
Education	field of study relevance	100.00%
Education	certifications match	0.00%

Pair 06 | Junior Data Analyst to Data Engineer

Python and SQL transfer, but production data pipelines, Spark/Airflow and the required master degree are not documented.

Category	Sub-score	App (%)
Skills	hard skills match	40.00%
Skills	tools and frameworks match	100.00%
Skills	soft skills match	100.00%
Context	domain relevance	100.00%
Context	responsibilities match	6.14%
Context	summary alignment	6.14%
Experience	years of experience fit	89.80%
Experience	title seniority match	0.00%
Experience	recency factor	100.00%
Education	degree level fit	0.00%
Education	field of study relevance	100.00%
Education	certifications match	100.00%

Pair 07 | Frontend Developer to Senior Backend Developer

Git and general software background transfer, but core backend stack, banking duties and seniority are missing.

Category	Sub-score	App (%)
Skills	hard skills match	0.00%
Skills	tools and frameworks match	33.33%
Skills	soft skills match	100.00%
Context	domain relevance	50.00%
Context	responsibilities match	1.67%
Context	summary alignment	1.67%
Experience	years of experience fit	44.90%
Experience	title seniority match	0.00%
Experience	recency factor	100.00%
Education	degree level fit	100.00%
Education	field of study relevance	100.00%
Education	certifications match	100.00%

Pair 08 | Financial Analyst to Machine Learning Engineer

SQL is the only directly named shared skill. Financial reporting does not establish model engineering expertise or the required education.

Category	Sub-score	App (%)
Skills	hard skills match	50.00%
Skills	tools and frameworks match	0.00%
Skills	soft skills match	100.00%
Context	domain relevance	0.00%
Context	responsibilities match	1.51%
Context	summary alignment	1.51%
Experience	years of experience fit	100.00%
Experience	title seniority match	0.00%
Experience	recency factor	100.00%
Education	degree level fit	0.00%
Education	field of study relevance	0.00%
Education	certifications match	100.00%

Pair 09 | Senior Chef to Lead DevOps Engineer

Long culinary tenure does not establish any required DevOps qualification.

Category	Sub-score	App (%)
Skills	hard skills match	0.00%
Skills	tools and frameworks match	0.00%
Skills	soft skills match	100.00%
Context	domain relevance	0.00%
Context	responsibilities match	0.00%
Context	summary alignment	0.00%
Experience	years of experience fit	100.00%
Experience	title seniority match	0.00%
Experience	recency factor	100.00%
Education	degree level fit	100.00%
Education	field of study relevance	0.00%
Education	certifications match	100.00%

Pair 10 | Restaurant Cook to Python Backend Developer

Injected instructions and repeated technologies are not credible professional evidence; the actual work history is unrelated.

Category	Sub-score	App (%)
Skills	hard skills match	0.00%
Skills	tools and frameworks match	0.00%
Skills	soft skills match	100.00%
Context	domain relevance	0.00%
Context	responsibilities match	0.00%
Context	summary alignment	0.00%
Experience	years of experience fit	100.00%
Experience	title seniority match	0.00%
Experience	recency factor	100.00%
Education	degree level fit	0.00%
Education	field of study relevance	0.00%
Education	certifications match	100.00%
